

District News

From Our Correspondents

MAVVIEW

The Red Cross Home and School Association was recently organized and the following officers elected: Mrs. Reg. Stein, president; Mrs. Orlo Doane, vice-president and secretary. The following social and program committee was named: Mrs. N. Love (convener); Miss Christofferson and Mrs. M. Richardson.

Future meetings will be held at the Red Cross School on the fourth Wednesday of every month at 8:30 p.m. Mr. Lavery, of the Foothills School Division will be asked to the next meeting on April 30th to help the group organize more completely. All parents of this district are invited to attend this meeting.

Mr. and Mrs. Lloyd Richardson were Calgary visitors last Friday and were accompanied home by their daughter, Nora, Mr. Sheepy and Margaret Plourd.

Mr. and Mrs. Reg. Stein and family and Mary and Stuart Douglas were Sunday visitors at the home of Mr. and Mrs. Orlo Doane. Miss Melba Stein and Jim Stein were Sunday visitors at Turner Valley.

BRANT

Mr. and Mrs. R. Mould and Doreen, of Calgary, and Bill Buchanan, of High River, were Sunday guests at the home of Mr. and Mrs. Don Shultz.

Don't forget the big amateur night at Brant Hall on Friday, April 25th, sponsored by the Vulcan Lions Club. There will be a dance afterwards with music by Hunter's Ramblers.

Mr. and Mrs. Geo. Hamilton and family were week-end visitors at Calgary, where they attended the wedding of Mrs. Hamilton's sister, Miss Jean (Herga) Holden, to Mr. George Miller, of Calgary, on April 19th.

There will be a ball game at Brant on Friday, April 26th—Brant girls vs. Nanton girls.

Mr. and Mrs. George Bateman were Calgary visitors this week.

Mr. and Mrs. Beatty and family, of Calgary, were Sunday visitors at the home of Mr. and Mrs. O. Brown.

Friends in Brant and district will be sorry to hear that Mrs. Ira Olsen is a patient in the High River hospital.

Spring work has already started in this district with a number of farmers cultivating and harrowing the land.

The Brant-Ensign Brownies held a successful tea on April 19th, in the United Church at Ensign.

BERRYWATER

Mr. and Mrs. J. K. Reimer and family, of Calgary, brother and sister-in-law of Mrs. Lloyd Munson, were week-end visitors at the Munson home. Lloyd Munson accompanied them back to Calgary on Monday.

Miss Marlene Lockin was a week-end guest of Miss Norma Adams. Mrs. R. Adams entertained on Sunday and Mrs. J. McRoberts on Tuesday in honor of Mrs. Gakin, of Vancouver, B.C., who was before her marriage, Miss Ruth Northcott, of Milo, and who is at present visiting with her parents in the district.

One day last week a fishing party consisting of Roy Adams and daughter, Norma, Marlene Lockin and Keith Healy were successful in making a catch of 15 fish in the Adams' dam.

Mrs. C. Love entertained in honor of her husband's birthday Saturday evening. Guests being Mr. and Mrs. L. A. Douglass, Bowness; Mr. and Mrs. D. B. Smith, Mr. and Mrs. H. C. Douglass.

Mr. and Mrs. L. A. Douglass, of Bowness, were house guests last week at the H. C. Douglass home. Mr. and Mrs. Doug Smith and family spent Sunday as guests at the home of Mrs. Smith's parents, Mr. and Mrs. Fountain, Milo.

The first session of "warble-fly" spraying in the district took place on Tuesday when the cattle herds of D. B. Smith, N. K. Rudd, H. C. Douglass and W. Oldfield were sprayed under management of R. E. Hill. We are glad to see that local stockmen are taking advantage of the opportunity they now have of destroying the warble fly.

Stuart Douglass spent the week at his home here preparing for his final examinations at the University of Alberta.

ENSIGN

Mr. and Mrs. Steve Sollenback are being congratulated on the birth of a baby daughter.

The Ladies' Community Club held their Social Evening on Friday, April 18th. Games and cards were enjoyed by young and old. The door prize, a gold banded water glass set, was won by Mrs. Thoreson, of Brant.

Mrs. Pasmore was renewing old acquaintances in the Ensign district over the week-end.

Kirkcaldy Boy Dies After Jumping From Moving Car

Douglas Stanley Bernard, seven-year-old son of Mr. and Mrs. Stan Bernard, of Kirkcaldy, died on Saturday, April 19th, as the result of an accident which occurred about one o'clock Saturday afternoon at the village six miles south of Vulcan.

Unnoticed by the driver, the youngster had been playing in the back of a light delivery truck and when the truck started to move off the lad became frightened and jumped from the moving vehicle. Unconscious when picked up by his father and other witnesses, the youngster was rushed to the Vulcan hospital, where he died shortly after admittance. Cause of death is understood to have been a broken neck. No inquest will be held.

Because of road conditions, funeral services were not held at Vulcan, but took place at High River on Wednesday, April 23rd. Interment was made in the family plot north of DeWinton.

Besides his father, who is an elevator agent at Kirkcaldy, and his mother, he is survived by two sisters, Margaret and Mary, and his grandmother, Mrs. M. Douglas, of Drumheller.

trict over the week-end.

Mrs. N. P. Larsen has been spending the past week with her daughter, Mrs. Dean Campbell, at Nanton.

Mr. Fred Noltes was a Calgary visitor the past few days where he obtained a physical examination at the Calgary clinic.

Miss Pat McFadden, of Calgary, is visiting at home of her parents, Mr. and Mrs. Jack McFadden.

The Brant-Ensign Brownies held their tea on Saturday, April 19th, at Ensign. A good number attended and the Brownies quite capably served the lunch.

Mr. and Mrs. Howard Foster and Ronnie were Calgary visitors last week.

Mr. and Mrs. S. Barker and Donna and Mr. and Mrs. Bill Turley attended the hockey game at Calgary last Sunday.

A few farmers in the district have been doing a little harvesting the past week and some have commenced their spring work.

Mr. and Mrs. Jake Hyde and family have taken up residence on the Chapman farm.

Doug and Buster Fisher were in the district this week visiting their mother, Mrs. Fisher, of Ensign. They had returned from Vancouver, where they had both spent the past winter.

The monthly Ladies' Auxiliary meeting was held on Tuesday, April 8th, at the home of Mrs. W. S. Barker. Reports on the Edmonton conference was given by Mrs. Blair and Mrs. Ball. Mrs. Betton, of High River, was in attendance and gave a talk on camping for Guides.

Some 25 friends gathered at the Ensign Hall Monday, April 14th, to honor Mrs. Jimmie Duguid, whose marriage took place recently. A delicious lunch was served after which gifts in a gaily decorated basket were presented to the guest of honor, who suitably responded.

ARMADA

Born, to Mr. and Mrs. J. Brotherhood in the Vulcan hospital April 15th, a son.

Mr. and Mrs. W. Shafer took their daughter Roberta back to school at Rockyford last week after she had spent the Easter holidays at Armada.

B. Marks' cow, which was recently killed by a C.P.R. train, was not his Jersey milk cow, it was learned. It was one of his range cows, which had recently given birth to twin calves.

Bob Birkeness returned to school at Champion on Sunday after spending Easter week at the home of his parents, Mr. and Mrs. Barb Birkeness.

Mr. and Mrs. Dick Donily and family have moved to Vulcan to reside.

Mr. and Mrs. T. Marks are moving into the Thiesmyer house. Mr. and Mrs. Art Marks have moved from Milo into their farm home. Mr. and Mrs. Norman Kunkel and family are moving into the N. Cotton house.

Mr. and Mrs. Merle Pearson and children left last week for their farm north of Bow City after spending the winter at the home of Mr. and Mrs. Geo. Brotherhood.

Miss Florence Magnusson, of Armada, and Ken Sokvintne, of Lomond, were recent Calgary visitors at the home of the former's sister, Miss Clara Magnusson.

Mrs. W. Brotherhood and children, of Lomond, were Monday visitors at the home of Mrs. A. M. Beagle.

Raymond Beagle and O. Herman were Arrowwood visitors last week at the home of the former's uncle.

Miss Jane Axford, of Vulcan, was a recent visitor at the home of her sister, Mrs. O. Herman.

Henry Ford Loss To Modern World

Great Propounder of Low Cost Mass-Production and High Living Standards for Workers. Sincere, Life-long Pacifist.

Henry Ford, pioneer of the motor industry and one of the great industrial and "humanists" of this age, died on April 7 at his home in Detroit. His death at the age of 83 years, brought to a sudden end a great life. He will rank as one of the strong men of American history. The amassing of a great personal fortune was only one feature of his success. His name will be immortal for many other achievements and aspirations.

He developed his world-wide industry out of what had been considered a lot of crazy ideas. His aim was low cost mass production, coupled with good quality and high living standards for workers.

When he was a 14-year-old boy on his father's farm near Detroit, he built a steam engine and from then on was obsessed with the idea of mechanical power. Then he conceived the plan of a horseless carriage at a price within reach of the average man.

In 1903 he sought without much luck to interest friends in financing his Ford Motor Co. in Detroit. In all he managed to scrape up \$28,000 for a start in incorporating his new company. By 1905 Mr. Ford had got 51% of the stock and in 1919 the family acquired all minority holdings.

So successful was the Ford dream that by 1908 the company declared a dividend 1000% and nine of the original investors stepped out as multi-millionaires.

When car production for civilian use was stopped in World War II, the company had produced over 30 million vehicles. It had an asset valuation of more than a billion, owned entirely by the Ford family.

This fortune enabled Mr. Ford to become a railway owner, pioneer in commercial aviation, grower of rubber, mine owner, shipping magnate, chemist, lumberman, manufacturer of farm tractors, glass, cloth and so on.

Mr. Ford "retired" in 1919, turning over the presidency to his son Edsel Ford. But he then purchased the Lincoln Car Co., launched his shipping fleet, started rubber growing in Brazil, and commenced the assembly of his "Early American village" in 1928. He completed his Greenfield village and his Edison Institute in 1930. In 1932 he brought out his V-8 model car.

In 1935 he sponsored the Conference of Agriculture that brought the Farm Chemurgic council, and in 1940 he began building airplane engines.

When Edsel Ford died in 1943, Henry Ford was almost 80 but he returned to the presidency, and carried on till his grandson Henry Ford II took over the presidency.

An Ardent Pacifist

Henry Ford was a lifetime pacifist who never lost an opportunity to assert his belief that wars were created by a few avaricious individuals seeking profit from armed

AT JAP TRIAL

Brig. Gen. H. G. Nolan, associate prosecutor for the Canadian prosecution section, speaks to the court during the war crimes trials of 28 alleged Jap war criminals, in Tokyo.

conflict. After World War I had been going for a year he financed a peace ship to Europe, but the 160 peace-makers began to quarrel amongst themselves and the venture was not one of his successes. But when U.S. did go into the war he put his resources at the service of the government. "I want peace" he said "and will fight like the devil to get it."

He felt there was something very phony about the early stages of World War 2, but he contributed heavily to production of war weapons. His famous "eagle boat" sub chasers were important in the first war, coming close to one ship a day.

When the Second World war came along his views were even more pronounced. Yet he did make bomber planes, tanks, armor plate and parts for jet planes. At the start of the war he said that if allowed his own freedom of design he could build 1000 fighter planes a day. But the claim was scoffed at he did build a bomber plane factory and got production up to one bomber every hour. He had assembled 8635 of the giant four-engined B24 Liberators. The total Ford output for World 2 was over 5 billions.

In Industrial Progress
Commentators on his life consider his greatest contributions to industrial progress were his ideas of low cost mass production and high standard of wages. His assembly line methods whereby each workman did only a very small job in the manufacture have been closely copied by other manufacturers in U.S.A. and overseas. His own workmen concede that he pays high wages, but some complain that they work so hard to keep pace with the assembly line that they more than earn their wages. But his low cost cars and good wages made it possible for the first time for workmen to enjoy comforts and own their own homes.

His philosophy was that there could be no such thing as over-production in the world. People have never had nor even can have too much of the necessities, the world over. Another theory was that higher wages and lower prices mean greater buying power and

(Continued on Back Page)

Survey Crew Now Working On Provincial Highway No. 23

New Route Likely Between Nobleford and Vulcan; Work Will Be Done This Year

Provincial highway No. 23 will definitely be rebuilt this year, according to further information received last week by the Advocate.

Word received from the Provincial Department of Public Works, through Rev. Peter Dawson, M.L.A., is that the Board of Highway Commissioners estimate for this highway is \$176,000. This is necessarily a rough estimate and the actual cost of rebuilding the road will not be known until the survey now in progress is completed.

Present indications are that the old highway will be rebuilt from Lethbridge to Nobleford and a new roadbed constructed from Nobleford to Vulcan. A survey crew is now at work on the route from Monarch to Vulcan and from Nobleford on the survey is being made west of the railroad track. The new route would eliminate certain level crossings. The highway would continue on its present route from Vulcan through Carleton Place to Calgary.

The Sunshine Trail from the Corner Store, twelve miles north of Vulcan to High River is also included in the rebuilding and resurfacing plans for this year. This assurance has been given both Rev. Dawson, who is M.L.A. for Little Bow constituency, and Ivan Casey, M.L.A. for Okotoks-High River constituency.

Former Champion Resident Dies

The death occurred at Tieton, Washington, April 19th, of Mrs. Ellen Boyd, affectionately known as "Grandma" Boyd, in her 92nd year. She resided at Champion from 1914 until 1937, when she left to reside with a daughter at Tieton.

The late Mrs. Boyd was born in Missouri on Jan. 12, 1856. When she was nine years of age she crossed the plains in a covered wagon with her parents.

She leaves to mourn her loss one son, Ralph Bond, of Champion; four daughters, Mrs. Ida Gritman, of Palouse, Wash.; Mrs. Denn Smith, of Fort St. John, B.C.; Mrs. Dan Harper, of Champion; and Mrs. Eva C. Cox, of Tieton, with whom she was residing at the time of her passing; sixteen grandchildren, thirteen great-grandchildren, and one sister, Mrs. Geo. West, of Palouse, Wash.

The sympathy of their many friends in Champion is extended to the bereaved family.

Cadet Corps Demonstration Draws Favorable Comment

A good crowd attended the Vulcan Cadet Corps parade and program on Vulcan Street last Wednesday afternoon and the smart appearance of the lads and the progress of their training elicited many favorable comments.

The march past took place at 2 o'clock, with the Corps passing the saluting base in column of route and in platoon formation. The salute was taken by District Cadet Officer Captain H. V. Davies, who also made the inspection, accompanied by Cadet Instructor J. Majakey and J. L. Findlay and members of the Cadet Committee.

Demonstrations of various phases of cadet training were given, under cadets as named: Rifle Drill (Sgt. Chell); First Aid (Cpl. Lyle Sales); Physical Training (2/Lt. Findlay and Sgt. Chell); Bren Gun (L/Cpl. Allan Clark); Morse Signalling (S/Sgt. Jordan); Rifle Coaching (L/Cpl. E. Mensinger); Semaphore Signalling (Sgts. Chell and Wolfe); Knots and Lashings (L/Cpl. D. Neville); Map Using (Cadet Gordon Nault).

2/Lt. J. L. Findlay spoke briefly on cadet training and Capt. Davies complimented the Corps on its appearance and progress in training. Following the demonstrations, refreshments were served for the cadets, their parents and friends in the Legion Hall. The committee in charge, Mrs. J. Mitchell, Mrs. F. Mensinger and Mrs. P. Benoit, were assisted by Mrs. Collier's Cadettes.

Addressing the parents and friends, Capt. Davies emphasized the value of cadet training in teaching the boys how to be better citizens of Canada.

Original plans for the day had included the presentation of the cadet flag to the Corps by Major J. K. Mahony, V.C., but as the flag was not yet available this ceremony will take place at a later date. The Cadet flag is being purchased for the local Corps by Dr. G. M. Carson.

Egg Within An Egg

One of the Leghorn hens owned by Bob Irwin, who farms ten miles west of town, really outdid herself the other day. An egg, brought into the Advocate office last week by Mr. Irwin, measured seven and a quarter inches in circumference one way and eight and three-quarter inches the other way, and in addition to the usual yolk and white that one expects to find in an egg contained another fully shelled egg of good size. The inner egg did not contain a yolk, but it was still a very noble effort on the part of the little Leghorn hen.

Mock Wedding At Shower

CHAMPION

Thursday evening, April 17, was the date chosen by Mrs. Walter Harris, Mrs. James Buchan and Mrs. W. Smith to entertain at the home of the former at a post-nuptial shower in honor of Mrs. William Gatenby, nee Patricia Willis. Forty-six guests were present.

An amusing feature of the evening was a mock wedding. The bride's part was taken by Mrs. B. Hummel, the groom was Miss D. Yake, bridesmaid Mrs. R. Hegland, groomsmen Mrs. C. Vliet, flower girl Mrs. L. Latiff, bride's father, Mrs. D. Chamberlain, and parson, Mrs. R. Bond. A bride's book was autographed by the guests.

The spacious rooms were beautifully decorated in pink and white streamers and the floral decorations were pink and white sweet peas. The bride's chair was under a white embroidered frilly parasol with fine silvery streamers falling from the brim to represent showers of rain drops.

Misses Audrey Harris and Elaine Granlin brought in a beautifully decorated hamper containing the many lovely gifts. Mrs. R. Bon made the presentation in well chosen words, to which the bride responded fittingly. Mrs. V. Stout and Mrs. W. McKinnon assisted the hostesses in serving a delicious lunch.

Variable Weather

The weather remains variable, with much moisture. A steady rainfall on Sunday was followed Monday evening by a wet snowfall that blanketed the ground to a depth of about two inches. Warmer weather Tuesday saw the snow disappear, but skies remained cloudy.

The wet weather is keeping farmers off the land but preparations for seeding and other spring work are going ahead and many will be on the land as soon as it is dry enough. Seeding will not likely be in full swing for another ten days or two weeks, according to general opinion.

Services Held

Throughout the Diocese of Calgary, and the High River Parish, the last Sunday, Memorial services were held to the memory of His Grace, Archbishop Derwyn Trevor Owen of Toronto, Primate of All Canada. Tribute was paid to his outstanding spiritual character and his leadership and statesmanship, especially during the war years. The aim of these years with the responsibility of the dual office of Primate and Archbishop undoubtedly brought about his collapse and death. Archbishop Owen spent his boyhood farming in Manitoba, and later as an undergraduate served with Survey parties through Central and Southern foothill country. These parts were very dear to him, and within recent years he visited many of the places he knew in the early years. Editorials in many prominent papers described him as a great Canadian gentleman, scholar and leader who will be recorded in history as one of Canada's noblest sons.

MASCOT ARRIVES IN ALASKA BY PARACHUTE

After being parachuted from a high-flying plane during manoeuvres near Ladd Field, Alaska, "Moe," the canine mascot of task force "Frigid," is released by two members of the airborne unit. At LEFT, giving a hand to "Moe," who is an expert at chute jumping, is Pte. Dr. and Straub, West Fargo, N.D., and at RIGHT, Corp. Salvadore Musso, Gramercy La.

ROBERT C. MUNRO EDITOR

GOOD NEWS

Word that provincial highway No. 23 is definitely going to be rebuilt this year is gratifying to residents of Vulcan, Champion and other towns served by this highway. The highway has been neglected until it is almost past repair, with the result that buses and trucks have found it necessary to cancel their runs in the summertime at the first sign of a rainstorm and driving to Calgary or High River is anything but a pleasurable experience for car-owners.

If the highway is re-routed west of the railway tracks from Nobleford to Vulcan it will eliminate some dangerous railway crossings and the troublesome low spots on the present highway near Champion and Carmangay.

The contributions of the people on the Aldersyde line in gas taxes and license fees warrants the complete rebuilding and re-routing where necessary of highway No. 23 and adequate maintenance of the road. The too often impassable condition of the road has cost these residents untold sums in personal expense and inconvenience these past few years. When the road is rebuilt pressure should be brought to bear to have it adequately maintained and thus avoid the slow but steady deterioration which has brought the highway to its present sad state.

IN THE CENT BELT

IN early days of the West and up to recent date Albertans had a hearty contempt for pennies. They referred with some scorn to "people from the

cent belt," meaning roughly anything east of the Great Lakes. Actually there wasn't much use for the penny out here, aside from buying a postage stamp or a licorice stick. And westerners when out shopping in Eastern Canada ambled absentmindedly out of stores without waiting for their two cent or three cent change. Clerks would pursue them with the despised coinage, and no doubt the western habit of ignoring the penny was regarded as another evidence of western ostentation and lack of thrift. But it wasn't so intentionally. It was the rooted western habit of eliminating the weighty negligible little penny from most transactions.

But now we are ourselves all tied up in the cent belt. Pennies, pennies everywhere. Not that they have any value comparable with the good old days, but they are tacked on to almost every nickel transaction as a modest boost. To jump a chocolate bar from a nickel to a dime would draw down fire for 100% increase. So "they" (meaning whom?) hinch it up a penny at a time so that it draws unobtrusively nearer to the dime mark.

Similarly milk has been eased up a penny at a time, and many other requirements take small one cent jumps on the theory that the consumers will never notice. There never was a time when pockets were so weighted down with these little plagues. Not that anything short of a barrelful can buy much under its own power, but without those extra pennies you can buy practically nothing.

Some way this coinage doesn't seem natural in the west. It rasps and wears the spirit. It isn't native to the country, nor to the people who belong here. It must be some devilish plot to easternize us.

The other day a Calgary Herald editorial lamented the decline and fall of the Canadian nickel. It suggested that the government should start minting 6 cent, 8 cent, 17 cent pieces, or as an alternative it wondered why chocolate bars, pop bottles and so on shouldn't be cut down to current value of the nickel. It is true that the poor little nickel has fallen into dark and impotent days. But equally true and even more exasperating is that the decline of the nickel has resulted in the nasty encroachment of the penny. Anything to stem the tide of the penny pest in the west—or at least almost anything.

Pertinent Topics

Discussed by H.C.

The American lend-lease claim against Russia comes to eleven billion dollars. Every effort made by Washington to have the matter discussed was ignored until now when it is thought it can profitably be discussed in conjunction with Russia's application for a loan of a billion dollars. Uncle Sam may yet be sorry that he brought the matter up at all.

Marshal Stalin told Harold Stassen that every time he lifted the censorship on American correspondents at Moscow he regretted it because they wrote something derogatory about Russia's rulers. Some of them write things derogatory of their own rulers without taking any chance of their government clapping censorship upon them.

CHURCH NOTES

UNITED CHURCH OF CANADA

Vulcan Pastoral Charge
Otto H. Rollis, Minister
Sunday Services
11 a.m. worship; 7:00 p.m. organ prelude; 7:15 p.m. song service; 7:30 pm worship.

CHURCH OF CHRIST

11:00 a.m.—Morning Worship Service with the Lord's Supper and message on "The Garb of the False Teacher." Everyone is invited to this service.
12:00 noon will be the Sunday School hour with classes for all ages. It is much better to bring your children to these classes than it is to send them. You will enjoy it as well as they.
7:30 p.m.—Evening Evangelistic Service. If you like to sing or hear the truth of the Gospel proclaimed you will not miss this service.

ANGELICAN CHURCH

St. Aldhelm's, Vulcan—
2nd and 4th Sundays: 11 a.m., Holy Communion. Every Sunday: 7:30 p.m., Evensong and Sermon. Every Sunday at 12:15, Sunday School.

There will be no evening service at Vulcan on the third Sunday during the winter months.

Outside Points—
1st Sunday: St. John's, Lomond, 3 p.m.
3rd Sunday: Emmanuel, Carmangay, 3 p.m.

F. E. VORRATH, Minister

Henry A. Wallace is doing all he can to justify Roosevelt's action in selecting Truman for Vice-President. Disappointment and chagrin lead him to play the part of a copperhead.

The president could not very well place restrictions upon him, neither could the British government. There the B.B.C. gave him the freedom of the air. It is government-controlled but the letting wing is strong enough to embarrass the government if it interfered to prevent Wallace from embarrassing both governments.

What alarms Dorothy Thompson is that the European commitments made by Mr. Truman will bankrupt the United States, but for two centuries Britain carried that burden at great cost and it was not until after she had borne the brunt of two great wars within a quarter century that the financial burden disposed her to hand the sceptre over to a preferred creditor.

Igor Goushenko says that some of the Aid-to-Russia fund donated by Canadians was used to help finance Soviet agents here. That fund ran up to four million dollars in less time than it took the British War Veterans fund to reach half that amount. Are none of the contributors interested enough to demand an investigation into Goushenko's charge? Is no M.P. or Senator interested enough to ask questions of the Ministry about it? Goushenko's statement is denied by Russia's daily sponsor in Canada. The money contributed was not of course handed over directly to Russian agents here and of course, Goushenko did not say it was.

A United Church clergyman deplores the public attitude toward communism and says he knows a lot of Communists who are 100% Christian. Their politics and their religion went hand in hand through Stalin's pact with Hitler, through the rape of Poland, the assault upon Finland and the massacre of two million Russians condemned by the OGPU. Senator Vandenberg urges Canada to join the Pan-American Union where a vacant seat awaits her, but our Prime Minister may think that, having committed us to defend the United States against attack from the north, the republic should feel care-free to look after its southern extremes without embroiling us in further hemispheric commitments.

Trees along the highways helped to block them last winter so that the public was put to great expense and inconvenience. Then, came spring and because river banks were denuded of trees, floods took place that caused much more damage and expense. Reforestation along rivers and streams instead of highways is indicated.

NOTICE

IN THE ESTATE OF LARSON HARVE ARENDS late of Syracuse, Nebraska, U.S.A., Merchant.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above-named Larson Harve Arends who died on the 20th June, 1941, leaving property in the Judicial Districts of Calgary and Lethbridge, are required to file with the undersigned Solicitor for his personal representative by the 1st June, 1947, a full statement duly verified of their claims and of any securities held by them and that after that date the personal representative will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims so filed or which have been brought to his knowledge. Dated this 9th April 1947.
HERBERT J. MABER,
Vulcan, Alberta.

Air Flight At 79 Years of Age

Mrs. N. E. Rhodes of Brant, who is 79 years of age, took an airplane trip on Saturday from the High River airport in a Cessna 120 owned and piloted by Steve Dickson of Brant.

For two or three years Mrs. Rhodes has had a keen ambition to take a plane flight, and on Saturday this long anticipated thrill was satisfied. It was a half-hour trip, and although there have been smoother days for flying, Mrs. Rhodes thoroughly enjoyed the bird's eye view of the old familiar scenes in this part of the country. Mr. Dickson has been housing his plane at the High River airport but has converted a garage at his home into a hangar, and hopes to keep the plane right in his own backyard.

RECIPE CONTEST

PURPOSE OF CONTEST

The primary purpose behind this competition is to obtain a delicious typical serving which will become famous as Alberta's distinctive dish. The secondary purpose is to awaken the citizens of Alberta to the importance of appetizing food and to improve the standards of food and service, in Alberta's eating places. Good food encourages visitors to this Province to return again. Tourist business is big business—in which everyone shares.

THE PRIZES

The ONE THOUSAND DOLLARS in prizes includes FIRST PRIZE \$500.00 and Gold Medal; SECOND PRIZE, \$200.00 and Silver Medal; THIRD PRIZE, \$100.00 and Bronze Medal. In addition, the Western Stock Growers' Association have offered \$150.00 in cash prizes if the winning recipes are created around Alberta's Good Beef.

JUDGING OF CONTEST

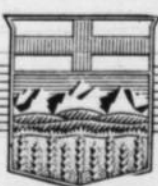

Recipes will be judged by leading culinary experts. Every section of the Province shares an equal chance by selection of a winner from zones. Zone winners will assemble at a central point to establish the final winners.

ENTER YOUR RECIPE NOW!

Contest Closes Midnight April 30

If you have not already secured the official entry form... contact your District Agriculturist or write to:

Housecleaning Drives "Empties" Into the Open

Housewives Join Search For E. B. Bottles

Hundreds of housewives in Alberta's rural and urban districts are reported today to be co-operating in the extensive search to apprehend E. B. Bottles, missing from duty for several months.

"Bottles", commonly known by the full name of "Empty Beer Bottles", and also under the alias of "Empties", may be hiding out in closets, basement corners or attics. Housewives in their spring cleaning drive are searching these favorite haunts of "Bottles" in an effort to bring the fugitive to justice. A reward of 20 cents per dozen for apprehension and recovery of "Empties" is offered by Deliveries Ltd.

An acute situation still exists in regard to the shortage of Bottles in Brewing Industry.

Deliveries Limited, Agents for Alberta Breweries, reports present shortages are due solely to "Bottles" disappearance from work. "Empties" cannot be replaced at this time and anyone knowing the whereabouts of "E. B. Bottles" is urged to communicate with their nearest Deliveries Limited Depot at Edmonton, Calgary, Lethbridge, Medicine Hat, Camrose, Banff, Blairmore, Drumheller or McLennan.

CASH REWARD

In Alberta cities, arrangements have been made for taking "Bottles" into custody and paying reward at the householder's home. At rural points local freight agents will see that "Bottles" is escorted "Collect" to the nearest Deliveries Ltd. Depot and cash reward will be mailed immediately on recovery.

Items From Bob Edwards' Inimitable "Eye Opener"

Bob Edwards, editor of the High River Eye Opener, from 1902 to 1904, and later of the Calgary Eye Opener, had great admiration for the R.N.W.M.P. This was one form of authority which he held in respect, and frequently called attention to the fact that they were grossly underpaid. In his August 6, 1906 issue of the Calgary Eye Opener, he is indignant because the Mounties who captured the Kamloops train robbers had not yet been paid the promised special awards for capture "dead or alive." However, for the satisfaction of readers who recall the incident, it must be added that the C.P.R. and the government later paid up as promised. And Bob Edwards in later issues acknowledges this quite handsomely.

Calgary Eye Opener, Aug. 6, 1906
Train Robbery Reward

No signs yet of the five doughty members of the R.N.W.M.P. getting any of the reward they earned in capturing those three notorious train robbers. There are three rewards, aggregating \$11,500, to which they are entitled.

What is the betting that they get beat out of the whole thing? Being policemen, living under military discipline, they cannot make any very strenuous move in the matter—in fact they cannot make any move at all—a circumstance which allows mean advantage to be taken.

Here is the Reward placard which was published and broadcast immediately after the robbery:

\$11,500 Reward

The Canadian Pacific Railway Co., offers a reward of \$5000 for the capture, dead or alive, of the three robbers who held up train 97 between Ducks and Kamloops on the morning of the 9th inst., or \$1000 for the capture, dead or alive of any one of the robbers.

The Dominion Government also offers \$5000 on the same terms as the above.

The B.C. provincial government offers \$1500 for each man for capture and conviction. By Order, Kamloops, B.C., May 12, 1906.

Why Don't They Pay Up?

The Dominion Government has a loophole for escape of payment through the Mounted Police rule no member of the force is entitled to reward for doing his duty.

That is all very well. But the duty performed in the present instance was performed outside the territory in which the police had engaged to serve. Commissioner Perry, we understand, is doing his best for the men and may bring the authorities at Ottawa to a proper sense of their obligation. The moral effect of the capture on the desperado class is of incalculable value to the west.

But there is absolutely no excuse for the C.P.R. wiggling out of the obligation they undertook. It was William Whyte himself who applied for the loan of R.N.W.M.P. to pursue the search. He had previously had \$30,000 worth of experience in discovering the incompetence of the Thistle Detective Agency in connection with the Mission Junction train robbery. The same old desperado, Bill Miner, was implicated that time. So in applying for the loan of a batch of R.N.W.M.P., William Whyte of the C.P.R. did so expecting that they would succeed in capturing these men who had proved such a menace to his railway. It is presumed that he offered the \$5000 reward in cold blood and full control of his senses. Then why in heaven's name not put up.

If the C.P.R. fails to fulfil this self imposed obligation, we have a picture of Mounted Police dashing out and risking their lives to capture C.P.R. hold-up men on future occasions.

As for the reward offered by the B.C. government no one really ever expected it to be paid. They have the reputation of being crookier than the train robbers themselves.

Misleading

The public is under the impression that the Mounted Police recently got a raise in pay of 25 cts. A coast-to-coast telephone strike in United States started Monday morning. If prolonged it will bring great disruption.

The British government conscription bill has modified compulsory service from 18 months to one year. There was strong Tory opposition.

A man at Portland, Oregon went up in a plane tossing handfuls of dry ice pellets out of the plane at 10,000 feet, and brought a snowstorm to within 800 feet of the ground, which melted as it neared the warm earth. He used 17 lbs. of dry ice and got hundreds of tons of snow and rain.

a day. Well, they didn't. The newspapers were full of non-sensical guff about this magnificent recognition. But as a matter of fact that 25 cts. raise is not realized till a constable has accomplished nine years' service.

Too Many Duties

Since we are on the subject of the police it might be good opportunity to draw attention to the anomaly in the position of a R.N.

W.M.P. inspector sitting in judgment as a magistrate.

Here we have a victim arrested by the police, prosecuted by the police, tried by the police and sentenced by the police. Technically the same man is arrester, prosecutor and judge. It might not be so bad in the lone north where there are no Justices of the Peace, but in populated sections the individual charged with a crime should have a better run for his alley.

Happily our R.N.W.M.P. inspectors are men with a high sense of honor and we do not believe they have taken arbitrary action to the prejudice of a prisoner. But it is hardly fair that a prisoner who may be innocent as Mary's lamb has to come for hearing before the same outfit that procured evidence against him.

Lots of Water In Frank Lake

Frank lake is full of water, and old residents say it is carrying more water this year than in any year since 1921. There are multitudes of duck and geese making use of the lake, and this bird population has cost property owners in the vicinity a lot of wheat. These men have donated liberally even though involuntarily, to

Canada Has Key Place at Geneva

Ross Munro, Canadian Press writer, commenting on the 18-power international trade conference opening on April 10 at Geneva, says:

"As a dollar country and a powerful creditor and trading nation, Canada is in a key position as she enters the international trade conference."

"Next to the United States and Britain, Canada will wield more influence than any other country in this 17-member preparatory committee meeting which is working towards the goal of an international trade organization, trade experts said. The 18th member was Russia but Moscow declined an invitation to attend."

"Strong efforts will be made to break down many trade barriers for the benefit of all. At the same time efforts will be made to protect national interests considered essential in the competitive scramble for world trade."

"From a Canadian viewpoint Canada has a foot in the two main trading camps. She has great trading interests with the United States on the dollar basis but also is tied by sentiment and trading interest to Britain and the sterling bloc which includes the other three dominions. The Canadian government, it is understood, is almost wholeheartedly behind the motives which appear to move the United States in its proposals for freer world trade. In this principle Canada would support the United States quite strongly."

"Canada, though, in these coming negotiations will take the position that in any tariff concessions made she must obtain substantial enough advantages to warrant giving up any preference."

At the annual meeting of Alberta teachers in Edmonton, a motion called for \$1500 minimum for teachers instead of \$1000.

Ducks Unlimited and migratory fowl encouragement.

At the present time Frank lake is full from the Brant road to Sunshine trail. It covers about 1600 acres and is a mile wide in places.

Oat Varieties in Western Canada

Last year, for the first time, Line Elevator grain buyers were asked to estimate the percentage of the total oat acreage, in their own districts, occupied by different oat varieties. A total of 2,256 Agents completed and returned variety survey forms. A brief summary of the survey follows:

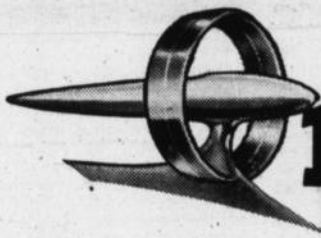

Manitoba. In 1946, the percentage of the total oat acreage occupied by the recommended varieties, namely, Vanguard (43.2%), Ajax (29.7%), and Exeter (4.5%), was 77.4 per cent. For 1947, Vanguard, Ajax, and Exeter are the officially approved varieties for all Manitoba soil zones, with this exception—Vanguard is not recommended for Zone 2A (Red River Valley).

Saskatchewan. The three recommended varieties—Victory (39.2%), Ajax (18.6%), and Exeter (1.4%)—occupied only 59.2% of the total Saskatchewan oat acreage in 1946. The percentage of the acreage devoted to non-recommended varieties was as follows: Banner, 21.0%; Vanguard, 11.4%; Gopher, 5.5%; and others, 2.9%. In 1947, Victory, Ajax, and Exeter are again the officially recommended varieties for Saskatchewan.

Alberta. Victory is the most popular oat variety in Alberta. In 1946, it occupied 59.0% of the total oat acreage, Banner (21.0%), Legacy (6.7%), and certain other approved varieties, were grown on 34.8% of the acreage. Only 6.0% of the 1946 Alberta oat acreage was devoted to non-recommended varieties. Victory, Ajax, Legacy, Larkin, Eagle, and Banner (Zone 4 only) are recommended for 1947.

Prairie Provinces. In 1946, the percentage of the total oat acreage in Western Canada occupied by different varieties was as follows: Victory, 39.5%; Banner, 18.1%; Ajax, 16.3%; Vanguard, 14.0%; Gopher, 4.2%; and others, 7.9%.

Information on the varieties of oats officially recommended for your particular district in 1947 can be obtained from your local Agricultural Representative, or nearest Dominion Experimental or Illustration Station. Treatment of all oat seed planted in Western Canada in 1947 is strongly recommended.

on Target for '47

STAND back—take it all in—and make sure you don't miss a thing. For what we've pictured for you here is the whole Highway Hit Parade of 1947—wrapped up in one glamorous bundle.

Those long, flowing, follow-through fenders—there's a style note you'll see echoed in automotive fashions for a long time to come. That generous beam amidships—there's the drivingroom you've been seeking, with legroom, headroom, elbowroom all around.

That broad, deep bonnet spells power aplenty—eager, lively Fireball power from an engine that seems to stay forever young. That hug-the-road look means steadiness; coil springs on all four wheels spell matchless, floating ride; wide-swinging doors open on interiors both handy and handsome in arrangement.

In a word—here's a car squarely on target, whether you go for style or size, performance or value. Here's Canada's most wanted car—and easily Canada's most sought-after buy.

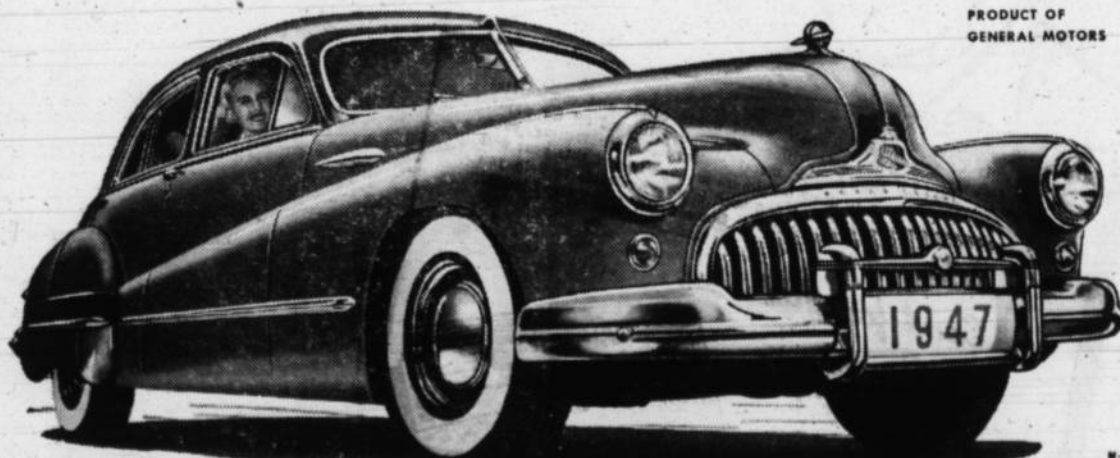

The demand for new cars is still so great that it may be some time before you take the wheel of your new Buick. Make sure your present car keeps rolling. The better its condition, the safer you are . . . and the higher its potential trade-in value.

100 Years Making Farm Machinery

Leonard Brockington, K.C., and Other Speakers Tell of Advance in Farm Machinery in Canada, Speaking at Centennial Massey-Harris Dinner

Many people listened to a speech broadcast by Leonard Brockington, K.C. when he spoke at the celebration of Massey-Harris hundredth anniversary recently.

Introduced by James S. Duncan, president of the Company, Mr. Brockington spoke not only of Massey-Harris development, but also of general advance in agriculture and farm equipment.

Mr. Brockington likened the expansion of the company—the Massey and Harris enterprises were amalgamated in 1891—to the development of agriculture in Canada. He recalled that the first wheat was grown in Canada 330 years ago by Louis Hebert near what is now Quebec and traced the conquest of the soil up through the years to 1944 when, he said, Canada exported nearly 1000 million dollars worth of food and agricultural products to help a shattered world.

Year by year they amalgamated or affiliated with other farm implement plants. By 1913 more than half their output was going to Europe.

By 1880 both Massey and Harris had expanded to the point where they were going after foreign business. By 1891, they amalgamated as Massey-Harris, fought in the war of 1812. In 1847 he was successfully farming at Newcastle, Ontario where he set up a small shop to make plows, scufflers, etc. At the same time Rev John Harris of Brantford began making plows and wooden revolving hay rakes his own invention. When there were practically none.

"In the year 1850 came the beginning of mechanized farming, which has brought invention of rakes, steam plows, seed drills, tractorless combines. This has freed some portion of farm lives for leisure, released millions to other pursuits, raised standards of living and wages, opened up new lands on the western prairies. Tomorrow it will revolutionize Asia and Africa."

Other speakers dealt with the amazing growth of the world-wide company, Massey-Harris. Daniel Massey, an American lad had taken charge of his family at the age of 13 while his father

"At the time when Daniel Massey and Alanson Harris began to make their plows and rakes," he stated, "it was considered good work for two men to cut and bind three acres of grain in the course of a summer day. Today the great grandson and even the great grand daughter of a farmer of 1847 can cut and thresh 50 acres of grain between sunrise and sunset. The average farming of the Canadian man today is 85 acres."

"We sometimes find it hard to imagine the great labours and the great loneliness of those who went before us," said Mr. Brockington. "It was interesting to find, for instance, that in the year 1847, in what is now Manitoba, there were about 4,900 people and 950 families 750 houses, 475 ploughs and 575 harrows. In Alberta and Saskatchewan by 1925 plants were opened in France and Germany. In 1946 a plant was opened in England."

In 1847 farm implements were not much better than those used by Egyptians. Today the latest sensational development is the self-propelled combine.

Canadian machinery was in Germany during the war, and in 1889 plows and reapers stamped "Brantford, Canada" were used on farm in Russia and Chili.

Dr. Stanley and Bob Edwards

Former High River Doctor Recalls Some of His Associations With Colorful and Erring Editor of High River Eye Opener

In the current issue of the Historical Bulletin published by the Calgary Associate Clinic, Dr. G.D. Stanley adds to western lore by recalling some of his experiences with Bob Edwards, editor of the High River Eye Opener. During his practice in High River Dr. Stanley was closely associated with Bob Edwards, both in professional capacity and a friendly way.

In his foreword the doctor says: "This article is not to be read as an official life-story of the unique 'Bob' Edwards or of his famous High River Eye Opener, but is simply a narration of a few of the many incidents that concerned Bob and the writer. That relationship was close during the early years of our medical practice in High River and during the earliest days of the High River Eye Opener."

"Bob started his paper there in 1902. His best friend was Jerry Boyce, proprietor of the Astoria Hotel, and Jerry financed Bob for a multitude of his needs. Bob had long since given up the idea of keeping any finances for himself. Accordingly the Eye-Opener got going, and something prompted us to file away copies of several of its earliest issues. This was more than Bob did, for he habitually neglected to keep anything, let alone copies of his own peculiar effusions of literary genius. The reader will note how our forethought helped Bob out of a predicament years later. We shall refer in a moment to one of Bob's letters to us, but to appreciate its significance the reader should note that he was a frequent visitor to us in our professional capacity and in a personal relationship also. Thus, all financial records between us, to or from, were discarded and particularly 'from' as it applied to Bob."

"After he had stirred up a hornet's nest in the community he was compelled by reason of the resulting was called in the Methodist church and we were appointed to occupy the chair. Bob interpreted that chairmanship as a personal slap in the face, and Bob was strangely hypersensitive at all times. Besides on the morning following the issue of the paper he had called to get our opinion as was his custom and we intimated we didn't think much of it. 'Don't you believe it's true?' he asked. We replied, 'I have purposely avoiding finding out. True or untrue, your paper is not just filed in attacking a citizen personally.' Bob returned to his room and wrote a note as follows:

"Dear Friend Doctor: I cannot help but interpret your comments to me, and your acting as chairman last night as a personal matter. I regret that a friendship I esteemed so highly as I am broken; nevertheless when I get sloppy, I shall still send for you, and I know you will come."

"When Bob left High River we were very much in the back of Bob's mind as far as his friendship was concerned, although we were glad to say that in later years we were restored to favour, and his old-time geniality remained for

**Good News for Farmers
FLAX WILL
BRING YOU
\$5.00 per BUSHEL**

The Honorable James G. Gardiner announced March 17th that, effective August 1st, the price for 1947 flax crop will be \$5.00 per bushel, basis No. 1 C.W. Fort William. Flax is now Canada's most profitable crop.

Not only Canada, but the whole world needs edible and commercial fats and oils. The flax you will grow supplies linseed oil for paint, linoleum, printers' ink, rubber, metal castings... shortening, even livestock feed. Plan to grow maximum acreage in flax this year and every year. Special re-cleaned flax seed is now available to help you get started. Write to the Alberta Linseed Oil Company, Limited, Medicine Hat, Alberta.

THE ALBERTA LINSEED OIL CO., LTD.,

MEDICINE HAT, ALBERTA

Stanley and Young, two temperance cranks. Even dear old Okotoks charges none... TOO MUCH STANLEY again... the next thing will be the construction of a public square... with fountains playing, tame squirrels running about, a bear or two and an equestrian statue of Buck Smith astride a flee-bitten cayuse....

"Perhaps we shall write more at a later date about Bob Edwards' friendship if the Bulletin will permit, for we have many more stories. He had some faults that cannot be denied but he had many virtues too. He had many fast friends and we are glad to have been one of them."

Giving More For District Roads

More than \$2,000,000 will be spent on district highways and local roads by the provincial government in 1947 in its greatly increased road budget, according to figures compiled by the Alberta Motor Association.

The greatly increased appropriation is gratifying to the A.M.A. which has advocated larger expenditures on the provincial road system for many years. The importance of local and market roads as feeder to the main routes is recognized.

On capital account there \$1,250,000 for district highways which included \$800,000 for roads in municipal. This is \$810,000 more than the 1946 vote.

On income account, the vote for district highways and local roads is \$900,000, an increase of \$50,000. This vote includes \$400,000 in special grants, which is an increase of \$100,000 over last year.

Thus it is evident that considerable program will be undertaken this year in improving the market and secondary roads which are such an important part of the provincial system.—A. M. Review.

On April 1 gas prices in Alberta went up to 36 cts. a gallon for standard. On that date the federal 3 cent tax went off; the provincial 2 cent additional tax went on, and there is provision also for increased returns to the oil companies.

Here's a grease gun for you that will save you money and speed up your work by making your farm machines operate more smoothly. It is an Alemite hand lever gun designed and manufactured by the originators of high pressure lubrication. It was developed and used for army vehicles during the war and can handle all types of light or heavy bodied and fibrous lubricants. It is strong, sturdy and efficient. It is offered along with a 25 lb. pail of Marvelube Grease at a special low price.

Several other attractive grease and grease equipment deals. See your Imperial Oil Agent.

IMPERIAL OIL LIMITED

Geese Arrive Ten Days Early

A curious contradiction in the face of this backward spring is the fact that migratory birds have returned to this country ten days earlier than usual. Geese were in flight ten days earlier than normal. This movement is linked with the early breakup of ice. But rob-

ins, bluebirds and killdeer have also anticipated milder weather than has prevailed by showing up on March 15. As a rule these summer birds do not put in an appearance till the last week of March. It would be interesting to know what instinct prompted this early migration. Maybe they are just restless like human kind. Or perhaps they were reading the April issues of magazines published in February and got misled.

Dr. Banting's Life Blend Of Frustration, Reward

Dr. Norman Foster Describes Early Struggles; Determination To Continue Research Resulting In Discovery of Insulin Treatment.

(From High River Times)

In giving an outline of the life of Sir Frederick Banting at Rotary Thursday evening, Dr. Norman Foster touched on homely details which made the life of this great Canadian an engrossing story. Frustrations and disappointments played their part in directing his energies and interests toward the eventual discovery of insulin. His early years of medical practice were neither smooth nor successful, but he finally received a full measure of recognition for his gift to the world of medical science.

Born on an isolated farm near Alliston, Ontario, in 1891, Sir Frederick was the son of parents who were of the old type religious trend. The Bible and Pilgrim's Progress were much-read books in his home. As a schoolboy he was serious, pugnacious and dreaded failure. As he progressed in his teens his father and childhood sweetheart Mary tried to incline him to the ministry and his first year at Victoria College, University of Toronto, was a start toward a theological career.

But contact with medical students developed in him interest in medicine. Small incidents which also had their influence in inclining him toward medicine were the death of a childhood friend from diabetes, and the death of another entire family of friends from tuberculosis.

However, with thought of the sacrifice his father was making for his education, he completed 1½ years in pre-theological work, and felt he was on the wrong track. He talked it over seriously with his father who consented to his change of calling on the understanding that assistance through medical school would be all the help he could expect from home.

In 1915 he enlisted in the first Great War, but was sent back to school for completion of training. Later he saw service at a base hospital in England, where he became interested in orthopedics, and then went on to France as a M.O. of a unit in service there. He displayed great valor and was awarded the M.C. But he was wounded in his right forearm, a serious disability for a young doctor. When he returned to England the authorities wanted to amputate his arm, but he staunchly refused, and won through to recovery.

Line Elevators Farm Service
Contributed by
DR. B. N. SMALLMAN
Officer-in-Charge, Stored Products Insect Laboratory, Winnipeg, Manitoba.

New Insect Laboratory

Dr. K. W. Neatby, Director, Science Service, Dominion Department of Agriculture, recently announced the establishment of a new Science Service Laboratory at Winnipeg—the Stored Product Insect Laboratory. This new laboratory will investigate methods for the control of insects attacking foodstuffs in storage facilities, processing plants, and during transport. The services of the new laboratory will be available to all those concerned with insect problems in farm storage, grain elevators, mill, feed plants, and seedhouses. Farmers, country elevator agents, and others, are asked to take full advantage of this service offered.

The most important foodstuffs today, when large sections of the world's population are facing starvation, are those capable of transportation and storage in large quantities without deterioration. Such are the cereal grains and their products. But insects take a heavy toll of these valuable food stuffs.

In Canada, of course, damage to stored products by insects is only a fraction of that in countries such as India. Nevertheless, the potential danger is real enough. Despite the advantages of our climate, and modern storage and processing facilities, insects cause important losses annually in Western Canada, for all stages of cereal production from the farmer's granary to the housewife's kitchen are subject to infestation.

The function of the new laboratory is to investigate and develop methods for reducing insect infestation in stored foods to a minimum. New insecticides and insecticidal methods will be tested both in the laboratory and under practical conditions. The development of practical and effective methods of reducing the enormous losses caused by stored product insects is of great economic importance to the food industries of Western Canada.

In 1919 he was discharged and spent a time in Orthopedic work at the Children's hospital in Toronto. Then he set up practice in London, Ontario, and bought a house intending to marry his childhood sweetheart Mary. Although she had waited for him through the years, Mary suddenly jilted him on the eve of marriage. They said she didn't like the house. Not only did he have this emotional upset, but his practice was very draggy. In his first month he had only one patient and things did not improve noticeably. These circumstances tended to make him very morose. In order to add to his income he became an instructor in physiology at Western University, London, Ontario.

This work necessitated hard study, and this fact, coupled with a bent toward research led him to an absorbing interest in the functions of the pancreas. It became an obsession with him to discover an extract that would control diabetes.

Other scientists had been experimenting with animals in tying off the duct leading from the pancreas to the small bowel. He too conducted experiments in which he followed this practice, waited for weeks, then removed the pancreas and made an extract which could safely be injected and could control diabetes.

This process was still in the experimental stage, and he made three trips to interest Prof. McLeod, head of physiology in University of Toronto. Finally he secured the consent of Prof. McLeod to make use of the Toronto laboratory during summer months, but it was made clear that the expense of the experimental work must not be on the University where he was given merely the use of the laboratory that he was on the right track, so dogged in his faith, that he sold his house in London, his practice and all that he had of a negotiable nature, and financed his own research in the Toronto laboratory. From that time onward Dr. Best shared equally in proving the experiment. And as work progressed they found they could make the extraction from beef pancreas by treating with acidulated alcohol. They secured pancreas from the abattoirs.

First Used on Humans in 1922

Insulin treatment was first tried on human patients in 1922. First experiments proved successful but there was still a period of trial and error until absolute security of treatment was arrived at. About one year later there was enough insulin produced commercially to supply the Toronto market, and in 1923 it was available generally.

During this time Dr. Collip was collaborator, doing very important work in securing mass production. He also deserves much credit.

In 1923 Dr. Banting and Prof. McLeod were jointly awarded the Nobel prize for this great contribution to medical science. In the same year, at the age of 32 Dr. Banting was married, but it did not prove a happy marriage and wound up in divorce.

However national recognition came with a \$7500 life annuity from the Dominion of Canada, and he had further material security in his salary of \$6000 a year as Chief of Research Dept., University of Toronto.

In 1934, he was knighted, and by that time his insulin treatment has brought hope to diabetic victims the world over. It was in 1935 that he travelled to Russia, and his popularity was not increased by his favorable reports on that country. In 1939 he married again and his tragic death in a plane crash occurred in 1941 when he was at the height of his powers. It is said that his wife is now training in medicine. He had a son by his first marriage, but whether that son is following in his famous father's footsteps is not known.

In any event that early "call" which took Sir Frederick Banting from the ministry to medicine, and that dislike of failure which was a boyhood characteristic had much to do with bringing to the world one of the greatest blessings of modern medicine.

It required nerve only on Molotov's part to allege that Turkey came into the war only at the last moment and that during the war Turkey was a profiteer. It but invites the retort that during 22 months of the war against Germany h's own country profited through its trade with Germany and that it entered the war against Japan only at the last moment and then profited by bargaining for the Kuniyas and bases in China.

A 17-man committee, headed by H. H. Hannan, president of Canadian Federation of Agriculture, will form an advisory council for the food board and Minister of Agriculture. Alberta representatives are O.S. Longman, deputy minister of Agriculture and L. E. Pharris, director of A.F.U. and A.F.A., Magrath.

Price Control Off Many Goods

Expected Rise in Many Lines as Controls Lifted From Household Goods, Used Cars, Etc.

Although manufacturers, wholesalers and retailers express the pious hope that prices will not shoot up as result of removal of price ceilings, the hard-pressed consumer is cringing in fear of what the new decontrol will do to his budget.

Price control still remains on agricultural implements, and to some extent on rentals; also on some textiles.

Footwear, wool goods, refrigerators, cooking ranges, washing machines, plumbing and sanitary equipment are all released from price control. So are all motor vehicles new or used, coke, coal and fuel wood.

The government has removed subsidies on imported and domestic fuel.

It is stated that no price increase is expected on new cars, but used cars will likely go up for a time, especially those of more recent years.

No increase is expected in soft drinks, but candy will go up.

Removal of ceilings on turkeys, ducks and geese is not expected to have much effect till months of heavy buying.

All past experience has shown that price removals do mean a jump in price, so the consumer is not optimistic and can only wait and see.

You Don't Go On A Trip

without thinking where you are going, do you?

Then Why

don't you start thinking about your trip to eternity?

Notice of Preparation of Assessment Roll

Town of Vulcan Assessment Roll 1947

NOTICE is hereby given that the Assessment Roll of the Town of Vulcan for the year 1947 has been prepared and is now open for inspection at the office of the Secretary-Treasurer from ten o'clock in the forenoon until four o'clock in the afternoon on each day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until noon; and that any person who desires to object to the entry of his name or of any other person upon the said roll or to the assessed value placed upon any property must within thirty day after the date of this notice lodge a complaint in writing with the Secretary-Treasurer.

Dated this 22nd day of April, 1947.

J. L. Findlay, Acting Sec.-Treas.

GROW FLAX!

"There's money in a weed-free crop at \$5.00 per bushel"

Flax cannot fight weeds and a profitable crop depends largely on successful weed control. But weeds are no Problem IF YOU KILL THEM WITH

"SINOX"
SELECTIVE WEED KILLER

Here is what the National Flax Committee says about "SINOX"

"Is spraying advised?" "YES"

Tests indicate that the use of "SINOX" may increase yields three to four bushels per acre.

— Kills the weeds — Saves the crops.

FLAX GROWERS!

You cannot afford to do without "SINOX." It is your protection and assurance of a better Flax Crop.

"SINOX" AND SPRAY RIGS ARE NOW AVAILABLE FROM YOUR NEAREST NATIONAL GRAIN AGENT. SEE HIM AT ONCE.

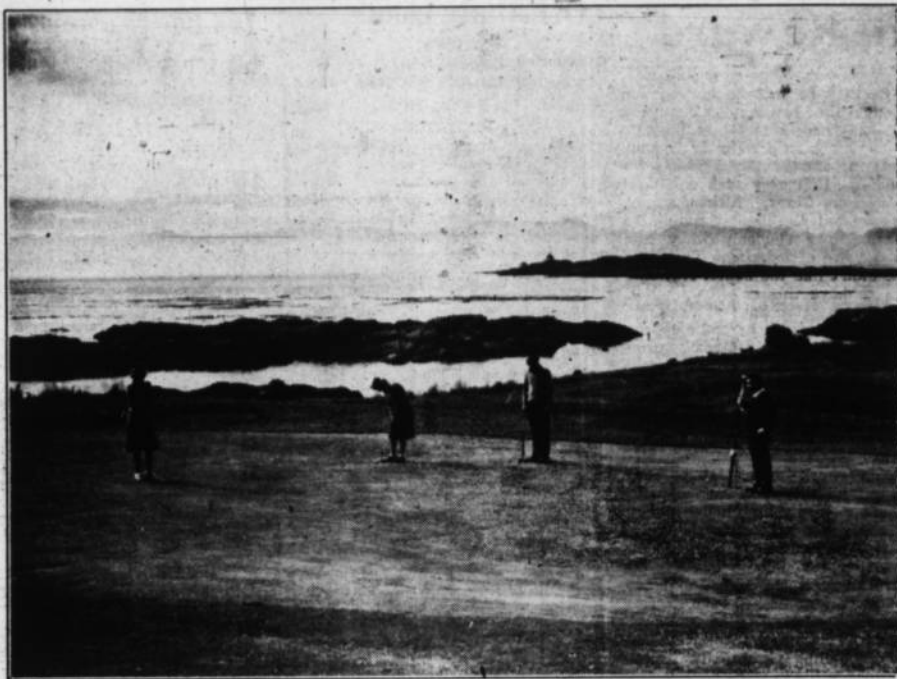

NATIONAL GRAIN COMPANY LIMITED

Distributors in Western Canada for "SINOX" and "STANTOX-40" 2, 4-D Products of Standard Agricultural Chemicals, also the FARGO SPRAYER.

Is Compulsory Insurance Good?

Details of the new Compulsory Automobile Insurance Act were the subject of a brief talk given by F. L. Watt at Rotary Thursday evening. The speaker said that in Alberta the new provision for unsatisfied judgments is called somewhat erroneously "a mercy fund." In Manitoba somewhat similar legislation badly called "Unsatisfied Judgment fund."

The Alberta Act, which requires an extra \$1.00 on every truck or car license, appears to have been somewhat hastily put through. But it has been patterned on the Manitoba Act which was made effective after years of research, and has had the benefit of this previous research. In the Manitoba Act there is a limit to the amount to be accumulated in this fund, after which the levy is to be reduced or dropped. There seems no such provision in the Alberta Act.

The fund is designed to compensate victims of car accidents in case the insurer of the accident is financially unable to pay. Action is taken in the ordinary way to recover damages. If the judgment is upheld by the Alberta Supreme Court, the next move is to apply for collection from the Compulsory Insurance fund.

The understanding is that probably a year would lapse before any settlement is made. There would be investigation launched to learn whether the defendant has funds to satisfy the judgment and all this would take time.

This is taken to mean that every effort would be made by the government to collect from the defendant, although compensation is taken care of under the compulsory insurance fund.

In investigating whether a defendant has any funds seizures can be made on the basis of the Exemption Act. For instance, a man's car could not be seized if he used it to earn a living. A farmer would be allowed to retain a certain minimum of stock, land and seed grain.

If the defendant's assets or insurance are not enough to satisfy the court judgment the remainder necessary is taken from the unsatisfied judgment fund.

In hit-and-run cases where the defendant is unknown, the victim can obtain damages from the fund, by launching court action against a dummy defendant and getting judgment.

It has been the experience of Manitoba that in the 32 months of operation of the Act there have been no claims laid, but on the other hand the purchase of personal car insurance has increased from 27% to 83%. This may also be the general effect in Alberta. At present about 35% of Alberta drivers carry insurance.

The limit of damages set in the Alberta Act is \$5000 for injury or death of one person, or \$10,000 for more than one. The guaranteed payment of damages is up to \$10,000.

Manitoba legislation calls for the impounding of vehicle if owner is not insured or lacks security. But in Alberta there is no such provision. The driver's license is cancelled, and cannot be re-issued until the person repays to the fund in full with interest any damages resulting out of the accident which resulted in the license being cancelled. When a new license is obtained the driver must prove financial responsibility.

Questions

In later discussion respecting the fund, it was brought out that once the government had to pay a claim efforts would still be continued to

try and collect from the defendant. A suggestion made was that one reason why personal insurance on cars in Manitoba had increased so greatly was that the individual car driver was safeguarding himself against getting tangled up with the government.

It was asked whether the Act would reflect on insurance rates. Mr. Watt thought that any effect that might come would be through a greatly increased volume of car insurance which in turn might lead to a reduction in rates.

Another question was whether this fund was ear-marked for the sole purpose of meeting unsatisfied judgments. Opinion was that it was so ear-marked.

It was also brought out that motor cycles do not come under the Act.

An Advocate of Margarine

The Senate has been obstinately fighting against the use of margarine in Canada, but Hon. W. D. Euler put up a strong plea for it in a speech the other day. He said:

Mr. Hannam contends that we should not permit the sale of oleomargarine, as it interferes with the sale of butter. But there are in this country at least eleven million consumers who cannot obtain a sufficient supply of butter and who are obliged to do with an allotment of six ounces a week. There has been a shortage of butter in Canada for some years, and Mr. Bracken the leader of the Conservative party in the House of Commons, states that this year there is going to be a shortage of sixty million pounds. This is not to be wondered at, for in the last two years we have exported to the United States 118,000 milk cows.

However, surely apart from the principle of freedom of choice, on which I base my main argument, it is the essence of selfishness for the dairyman to say, in effect, "If you do not buy my butter you may not buy a substitute" or "I forbid you to buy margarine, even though I have not the butter to sell you or have not as much as you want or need," or "You cannot buy margarine, even if you cannot afford to buy butter at twice the price of margarine." Despite the fact of increased wages from time to time, the ordinary working man with a family has a smaller purchasing power today than he has had for some time.

In the United States—I refer to that country because we are able to see what is going on there—coco-nut oil used to be an ingredient of oleomargarine, but after the war broke out manufacturers could not obtain a supply and they substituted cotton-seed oil, without any deterioration in the quality of the product. There is no argument as to the palatability or nourishing qualities of oleomargarine as it is made today. According to documentary evidence which I could bring here it has the same nourishing qualities as butter itself. So while butter cannot be obtained in desired quantities, why should we deprive the Canadian people of the right—for it is their right—to get a substitute that will serve their purposes just as well?

He continued that butter is not only scarce but higher than can be paid by many people. It is likely to go up to 55 or 60 cts. when the government subsidy is removed. He showed a sample of vegetable oleomargarine of fine quality that he got in Buffalo for 42 cts. a pound when butter sold for 80 cts.

"There is no just reason that people of this country should be prevented from buying this whole-

some product. But they have been prevented for 24 years. We are today importing New Zealand butter which comes from Britain depriving Britain of 12 million pounds. Yet Canadian farmers sold 118,000 milk cows to U.S.A. in two years and are still selling them."

Calgary Horse Sale New High

All recent records were broken at the Calgary horse sale on Saturday. A team of dark brown Percherons brought \$610, and were sold by Stan Milan of Three Hills who bought the team a year ago for \$170. John Farries of High River sold a team of chestnut Belgian mares to Parr Brothers of

Use and Danger Of 2-4-D Spray

(Lethbridge Experimental Station)

There has been continued interest in the newer herbicides during the past season, particularly with usually called 2, 4-D. The use of 2, 4-D is not to be considered as the only method for weed control, but rather as one of the most promising supplements to good cultural and cropping practices. The usefulness of 2, 4-D for lawn weeds and the spraying of some annuals in growing crops has been fairly well proven in most sections of the United States and Canada.

It is essential to observe a few precautions when using 2, 4-D. This chemical is very effective for dandelions and plantains without causing much injury to the grass, but any spray drift is almost certain death to flower borders and ornamental trees and shrubs. If 2, 4-D is used for roadside, fence-line, or field spraying, care should be taken to keep away from trees and hedges, susceptible crops such as alfalfa, flax, peas, beans and some other non-grass crops of minor importance.

Rates of application vary greatly, but recommendations given by the manufacturers usually can be followed with assurance. The general rate for lawn spraying and selective spraying is between $\frac{1}{2}$ and 1 pound for free acid equivalent per acre.

The amount of water used can be from 5 to 150 gallons per acre. A fog-type machine can be used to apply as little as 5 gallons of spray mixture per acre. If a boom-type spray rig is used, the amount of water is usually between 100 and 150 gallons per acre. Cost factors involved here are compensating as the cost of transporting a greater quantity of water when using a boom sprayer is partially offset by the lower cost of the boom sprayer as compared with the cost of a fog-type machine.

Middleton N.S. for \$465. A Kentucky saddle horse brought \$370, and a chestnut Belgian was bought by Parr Brothers for \$360.

Sale average was \$78.65, with 1100 head sold.

Inflation

(Moose Jaw Times-Journal)

If inflation gets the upper hand in Canada no one will escape, but it will bear with its greatest weight and bring the most misery and suffering to the people on fixed wages and salaries. Inflation means that the purchasing power of money is decreased. The Canadian dollar, which today has purchasing power as compared with pre-war years of approximately 80 cents, could be so decreased in purchasing power that only 20 cents worth of goods could be bought with it. The idea that inflation could not happen here is based on wishful thinking. The efforts that were made in Canada during the war to maintain the purchasing power of the Canadian dollar cannot now be lessened, for if they are not maintained Canada will be in the same position as

some other countries.

An example of what can happen under inflation is furnished by the receipt of a registered air mail letter from China at the offices of the Canadian Pacific Railway Company in Montreal. The letter, sent by a shareholder of the company from Shanghai, required the expenditure of \$4,350 in Chinese money. On the envelope there were affixed eight three-yen postage stamps, each one surcharged to a value of \$500, one \$200, one \$100 and one \$50 stamp (all Chinese dollars). To send a reply to the shareholder in Shanghai it would cost \$2.50 in Canadian funds. It has cost more to send such a letter from China to Canada for sometime past, but the value of Chinese money has been sinking rapidly in recent weeks. It is easy to imagine the misery and suffering that must prevail in China under the conditions which the postage on this letter indicates.

PONTIAC

A fine car made finer

A Product of General Motors

Unmatched for Balanced Goodness

To be REALLY good a car has to be good all the way through. And the 1947 Pontiac is a good car! That's why all aspects of the 1947 Pontiac are outstanding—beauty, performance, comfort, safety and dependability. Year after year, Pontiac has balanced goodness—with no one quality developed at the expense of another. Owners like everything about their Pontiacs. That's why Pontiac has more than a million owners—and more than a million friends! The 1947 model—a fine car made finer—is now in production.

The demand for new cars is still so great that it may be some time before you take the wheel of your new Pontiac. Make sure your present car keeps rolling. The better its condition, the safer you are—and the higher its potential trade-in value.

FEATURES that make PONTIAC a GOOD CAR!

- APPEARANCE—Distinctive Silver Streak Styling • New massive and harmonious front end design, new ornamentation.
- COMFORT—Big, roomy Body by Fisher • Triple-Cushioned Ride • Luxurious, Modern Interiors • Shock-Proof Knee-Action • Fisher No-Draft Ventilation • Handling Ease • All-Weather Engine Temperature Control.
- DEPENDABILITY—Smooth, powerful L-Head six or eight cylinder Engines • Full-Pressure Metered Flow Lubrication • Permanent, Highly-Efficient Oil Cleaner.
- ECONOMY—Scotch-Mist Quick Warm-up Manifold • Gas-electric • Vacuumatic Spark Control.
- SAFETY—Multi-seal Hydraulic Brakes • Unisteel Body • Doors hinged at Front • Tru-Arc Safety Steering • Clear Vision.

News from Champion

Royal Ruggles, formerly of
Three Hills, has accepted a po-
sition on the staff of Greenlee Motors
and his family will move to town
shortly.

C. Ferguson, of West Virginia,
U.S.A., has arrived to act as as-
sistant to Rev. Snider at the Gospel
Mission.

Bud Siler was a Lethbridge
visitor during the week-end.

Mr. and Mrs. Howard Orcutt
were week-end visitors at Calgary,
guests at the home of Mr. and Mrs.
D. Adams.

Mr. and Mrs. Oscar Sletto, Mr.
and Mrs. James Anderson, Bob and
Clayton Sletto spent Thursday at
Lethbridge.

Mr. and Mrs. Ray Ohlbeiser are
receiving congratulations on the
birth of a baby daughter, Gerd-
line, at St. Michael's hospital,
Lethbridge, Wednesday, April 16.

Mr. and Mrs. Dewey Greenlee
were business visitors at Calgary
for two days.

Mr. and Mrs. E. Eslinger and
children, of Calgary, formerly of
Champion, were visitors during the
week.

C. Vliet spent a few days at his
ranch at Waterton Lakes recently.
Mr. and Mrs. S. Williams, of
Travers, were visitors at the home
of the latter's parents, Mr. and
Mrs. Maronde, recently.

Chas. Luchia, of Lethbridge, was
a business visitor on Thursday.
Mrs. Jack Taylor is a patient
in the Carmangay hospital.

Miss A. Ellis, of Lethbridge,
spent the week-end visiting her
mother, Mrs. W. Ellis.

R. Dupue, of Stavely, was a
visitor in town on Saturday.

Art Hopkins was a Calgary
visitor for two days last week.

Mr. and Mrs. Orville Harper and
daughter, Miss Ruby, of Nakusp,
B.C., formerly of Champion, spent
a few days visiting old friends and
renewing acquaintances.

Hugh Frame, who was suddenly
taken ill last week, is improving
at his home.

Mrs. MacLeod, Sr., of Edmon-
ton, is a visitor, guest of her son
and daughter-in-law, Mr. and Mrs.
A. MacLeod.

Dan Harper, who has been a
patient in St. Michael's hospital,
Lethbridge, for ten days, has re-
turned to his home.

Mr. and Mrs. Fred Clever and
Mr. Geo. Clever were recent Leth-
bridge visitors.

Mr. and Mrs. B. A. Lloyd and
family, of Vulcan, were recent
visitors at the home of Mr. and
Mrs. W. Keenan.

Mr. and Mrs. James Groves and
family, of Patricia, spent the week-
end visiting at the home of Mr. and
Mrs. Max Groves.

Kenneth Smith, of Falun, was a
week-end guest at the home of his
uncle and aunt, Mr. and Mrs. Harry
E. Smith.

Mrs. McIntosh, mother of Mrs.
J. Taylor, was taken to Carman-
gay hospital this week, where she
will remain for some time.

Mr. and Mrs. George Wright and
the latter's father, Mr. Holmes,
were Lethbridge visitors last week.

Miss Ella Baron has accepted a
position on the staff of the Savoy
hotel dining room.

Miss Margaret Fath, of Coal-
hurst, was a week-end visitor at
the home of relatives.

Mrs. D. Greenlee was a Leth-
bridge visitor on Thursday.

Mrs. Fraser and daughter Carol
were recent Lethbridge visitors.

R. Maxwell spent two days in
Calgary last week.

Mr. W. McRae, of Calgary, was
a recent business visitor.

Miss Gloria Gatenby spent the
week-end at the C. G. Miller home.

Mr. and Mrs. Fred Fleming, Jr.,
are receiving congratulations on
the birth of a baby girl, Donna
Diane, Wednesday, April 16, at the
Vulcan hospital.

Mrs. D. Greenlee was a Leth-
bridge visitor on Thursday.

E. Peterson, of Lethbridge, has
joined the staff of Champion
Motors.

Mrs. F. Little was a Lethbridge
visitor during the week.

Mrs. R. Bond entertained at the
tea hour one afternoon recently,
complimentary to her daughter-in-
law, Mrs. Arnold Bond, of Nanton,
who was her house guest for a
week.

Mrs. C. Versluis was a Leth-
bridge visitor on Saturday.

Mr. and Mrs. Dick Grey and
daughter Judy, Misses Frances,
Margaret and Mae Miller, all of
Lethbridge, and Miss Dora Benson,
of Toronto, were Sunday visitors
at the home of Mr. and Mrs. C. G.
Miller.

Mr. and Mrs. W. I. Harris were
business visitors at Lethbridge on
Tuesday.

Mrs. Russell Brown spent two
days visiting relatives at Calgary
last week.

Miss Margaret Hegland, of Car-
mangay, was a visitor at the home
of Mrs. Emily Fraser recently.

Miss Doreen Stewart spent Sun-
day visiting friends at Lethbridge.

Mr. and Mrs. Leonard Voisey
were Calgary visitors last week.

Mr. and Mrs. Ed. Coe left on
Monday for Seattle, Wash., where
they will visit for the next two
weeks, guests of their sons and
daughters-in-law, Mr. and Mrs.
Earl Coe and Mr. and Mrs.
Lawrence Coe.

Mr. and Mrs. Clyde Coe and son
were Lethbridge visitors for two
days, guests at the home of Mr.
and Mrs. G. Frache.

Mrs. D. Adams, of Calgary, is
visiting at the home of her parents,
Mr. and Mrs. Albert Orcutt, for
a few days.

Mrs. Chas. Lebsack was a dele-
gate to the Home and School As-
sociation convention held at Oids

last week. Mrs. Lebsack represented
the Harmony group.

Mr. and Mrs. L. Warren and
daughter Ruth, and Mr. J. Cook,
of Calgary, formerly of Champion,
were week-end visitors at the
homes of Mr. and Mrs. Wilford
Warren and Mr. and Mrs. A. Nel-
son.

A baseball meeting was held in
the village council rooms on Tues-
day evening of last week. Ferris
Bouzyan was elected manager and
coach; Larry Hag, secretary-
treasurer, and Fred Watt captain.

A junior team is being mooted.
It was decided to repair the grand-
stand, put up new wire netting part
way around the diamond, have
benches made and placed around
sides of park. Other improvements
are also considered.

The Champion Chapter O.E.S.
held their monthly bridge party
at the home of Mr. and Mrs. E.
Griffin, April 16, with Mrs. R.
Clements and Mrs. J. Hagerman
as hostesses. First prizes went to
Mrs. G. Orr and G. Voisey, and con-
solation to Mrs. W. McIntyre and
G. Orr. Delicious refreshments
were served by the hostesses at
the conclusion of the play.

Practical Politics

(Printed Word)

A good story that might well
have been included in Gard's no-
table book of the old days in Alber-
ta, Johnny Chinook, is the one
about the famous non-drinker who
contested a constituency where
most of the voters were hard-
drinking miners. The candidate's
manager was worried because he
knew that if his man so much as
saw a bottle he would launch into
a strong denunciation of any one
who would have anything to do
with such a thing. As this would
surely irritate the miners and as
the election was not being fought
on the liquor issue, the manager
decided on a bold course aimed at
avoiding the subject.

Accordingly he went through the
constituency, keeping a day or so
ahead of his candidate, and talking
to every party henchman he could
find. He told the same story over
and over. What he said was that
the candidate was an alcoholic
whom the sight of a bottle or the
smell of drink would send him into
a three-weeks' spree. The result of
these advices was that the party
workers managed to keep liquor
out of the way of the candidate all
through his campaign tour in those
rough and woolly mining regions.

The good man never did find occa-
sion to denounce the evils of drink.
It is well-documented history that
the sympathetic miners elected him.

J. Harper Prowse, M.L.A., the
army representative in Alberta
legislature, indicated to a meeting
of Alberta Liberals in Edmonton
that he might accept provincial
Liberal leadership. He said that he
thought the Liberal party offered
Canada the only program and lead-
ership which will permit the coun-
try to achieve the future that all
want. He said that he would con-
tinue to serve army interests im-
partially in legislature.

Mr. and Mrs. W. I. Harris were
business visitors at Lethbridge on
Tuesday.

Mrs. Russell Brown spent two
days visiting relatives at Calgary
last week.

Miss Margaret Hegland, of Car-
mangay, was a visitor at the home
of Mrs. Emily Fraser recently.

Miss Doreen Stewart spent Sun-
day visiting friends at Lethbridge.

Mr. and Mrs. Leonard Voisey
were Calgary visitors last week.

Mr. and Mrs. Ed. Coe left on
Monday for Seattle, Wash., where
they will visit for the next two
weeks, guests of their sons and
daughters-in-law, Mr. and Mrs.
Earl Coe and Mr. and Mrs.
Lawrence Coe.

Mr. and Mrs. Clyde Coe and son
were Lethbridge visitors for two
days, guests at the home of Mr.
and Mrs. G. Frache.

Mrs. D. Adams, of Calgary, is
visiting at the home of her parents,
Mr. and Mrs. Albert Orcutt, for
a few days.

Mrs. Chas. Lebsack was a dele-
gate to the Home and School As-
sociation convention held at Oids

last week. Mrs. Lebsack represented
the Harmony group.

Mr. and Mrs. L. Warren and
daughter Ruth, and Mr. J. Cook,
of Calgary, formerly of Champion,
were week-end visitors at the
homes of Mr. and Mrs. Wilford
Warren and Mr. and Mrs. A. Nel-
son.

A baseball meeting was held in
the village council rooms on Tues-
day evening of last week. Ferris
Bouzyan was elected manager and
coach; Larry Hag, secretary-
treasurer, and Fred Watt captain.

A junior team is being mooted.
It was decided to repair the grand-
stand, put up new wire netting part
way around the diamond, have
benches made and placed around
sides of park. Other improvements
are also considered.

The Champion Chapter O.E.S.
held their monthly bridge party
at the home of Mr. and Mrs. E.
Griffin, April 16, with Mrs. R.
Clements and Mrs. J. Hagerman
as hostesses. First prizes went to
Mrs. G. Orr and G. Voisey, and con-
solation to Mrs. W. McIntyre and
G. Orr. Delicious refreshments
were served by the hostesses at
the conclusion of the play.

Mr. and Mrs. W. I. Harris were
business visitors at Lethbridge on
Tuesday.

daughter Ruth, and Mr. J. Cook,
of Calgary, formerly of Champion,
were week-end visitors at the
homes of Mr. and Mrs. Wilford
Warren and Mr. and Mrs. A. Nel-
son.

A baseball meeting was held in
the village council rooms on Tues-
day evening of last week. Ferris
Bouzyan was elected manager and
coach; Larry Hag, secretary-
treasurer, and Fred Watt captain.

A junior team is being mooted.
It was decided to repair the grand-
stand, put up new wire netting part
way around the diamond, have
benches made and placed around
sides of park. Other improvements
are also considered.

Herbert Hoover says that a
worse food crisis than ever faces
the world next year, because the
victors in the war have been de-
stroying European fertilizing man-
ufacturing plans.

Trans-Canada airlines have op-
erated for ten years and has had
an amazing record. It has grown
from 14 aircraft to 50 despite war
years and has more than doubled
its route. Its safety record is said
to be unsurpassed.

Paul Robeson has been charged
with Communist activities, and
Peoria, Illinois Council has disap-
proved appearance of any un-Am-
erican propagandist. But Robeson
is going to give his concert in Pe-
oria.

Harper Prowse, speaking of the
United Nations organization, said:
"So long as they keep talking to
each other, even if they are swear-
ing, at least they are not going to
war."

Henry Ford...

(Continued from Front Page)

more customers. Cut wages and you cut the number of customers.

He said that idleness was the cause of all world troubles, meaning idle land as well as idle men. His strongest conviction was that everything needed by industry could be produced from the soil, and he advocated the closest linking of farm and factory.

Led in Pay Boosts

He startled the world in 1914 by fixing \$5 a day as prevailing wage in the car industry. Other manufacturers called it suicide, but he went up to \$7 a day and still made it pay.

He was an individualist and opposed unionization of his factory until it was disclosed that the C.I.O. had a majority amongst his workers. Then he granted union demands and even proposed union dues check off.

Spring work has started in Armada, with a few farmers on the land and everyone winding up with their seed cleaning.

Newfoundland is considering future status has rejected the idea of becoming the 49th state of U.S.A. Another consideration is joining with Canada.
